Shippers' Academy International

The concept of connecting and educating global shippers was formulated as way back as 2011 in Singapore. The Shippers' Academy was designed to create capacity building among cargo owners (exporters, importers & traders) and service providers in international trade.

Shippers' Academy International is registered in Australia and its operational hub under Shippers' Academy Colombo is based in Sri Lanka. Shippers' Academy International will be establishing training centres around the world under its franchise.

SA-Connect a new concept will link global trading and logistics networks through the Indian Ocean hub & will be operated through Shippers' Academy Colombo which was established in 2011. The idea behind **SA-Connect** is to have a digital portal with reliable traders and service providers in different countries.

As the world is getting closer with technology, companies that need market access, market information and reliable partners for support services, dispute resolution, disruptive technology and building people networks will require reliable connectivity. This may be from your transportation needs, border control needs, tariffs and taxes and logistical support. Companies will also need trustworthy information to understand complexities when doing business. The member portal of **SA-Connect** will provide direct links through our hub in different continents and countries to facilitate trade and logistics.

SA-Connect

“Globalization 4.0 has only just begun, but we are already vastly under-prepared for it”

Klaus Schwab
Founder and Executive Chairman,
World Economic Forum

- Are you offering a reliable service/product?
- Are you looking to grow/ expand your business?
- Are you interested in new markets and customers?
- Do you believe in e-commerce and digital platforms?
- Do you need to improve sales and marketing?
- Do you believe in building relationships, introducing people and sharing experiences?

SA-Connect

What is **SA-Connect** & how can my business benefit?

In today's context, connectivity is an intelligent solution for supply chains, logistics and smart trade

A digital initiative with a virtual business network focused on connecting reliable business partners across continents and across borders who are involved in international trade, logistics, transportation and supply chain connectivity & related support services.

The member companies who join the network will have direct access to different service providers in different continents and countries via the portal to support their business needs on a B2B platform. The range of services will span many areas, covering global commerce and transport.
